

## **Do you need spring-mvc.jar in your classpath or is it part of spring-core?**

You need to add it in your classpath. Example by using Maven:

```
<dependency>  
  <groupId>org.springframework</groupId>  
  <artifactId>spring-webmvc</artifactId>  
  <version>4.3.12.RELEASE</version>  
</dependency>
```
